

Multiple Myeloma

CoMMpass MMRF Registry Data

27

Youngest multiple myeloma patient

64

Average age of multiple myeloma patients

93

Oldest multiple myeloma patient

Source: Multiple Myeloma Research Foundation. The MMRF CoMMpass Study. 2018.

Reported Symptoms in Multiple Myeloma Patients Within 2 Years Prior to Diagnosis

56% Viral infection

30% Cervical spine pain

48% Bacterial infection

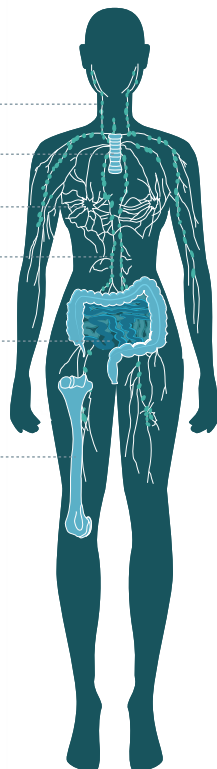

58% Back pain

9% Weight loss

59% Musculoskeletal pain

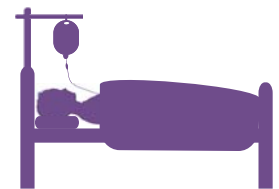

34% Nonspecific pain

13% No pain

Stem Cell Transplants for Multiple Myeloma Patients

5,000

Multiple myeloma receive high-dose chemotherapy and stem cell transplants each year in North America

Source: Multiple Myeloma Research Foundation (MMRF). What Is High-Dose Chemotherapy? 2018.

First-line Autologous Stem Cell Transplantations Median Survival

2.0 Years

Progression-free survival (PFS)

6.7 Years

Overall survival (OS)
